CS 4300: Artificial Intelligence

Assignment: Project PEAS Assessment

Complete a PEAS assessment for the environment you have selected for your project. The assessment should also identify the intended search strategy.

Create a folder called project in your git repository. Store a copy of the PEAS assessment document in it.

Required Submissions

- A PDF file containing your PEAS assessment, via Canvas.
- Push your git repository.

Passoff

Post your report to the Canvas assignment, and push your repository to the cloud.
