

Week 2 B assignment

Fog Server

Assignment

This assignment will allow you to demonstrate your proficiency with imaging machines.

Tasks

To begin with, your fog machine needs to have the following commands executed:

1. Deploy a fog instance.
2. Upload one of your existing vms (i.e. web)
3. Deploy the newly uploaded vm via pxe boot and fog to a new virtual machine.

Report

This will be demoed to the instructor on the due date.

Submission

- There will be no submission required, as you will pass this off in class.
